
Translation into English:

The only sensational element programmed by God to heal humans and all living beings is iodine!

Here are the properties of iodine programmed from Above:

1. When iodine enters the body, it recognizes harmful bacteria and destroys them, while leaving beneficial bacteria untouched. Iodine has a built-in “friend or foe” recognition program.
2. When iodine enters the body, it recognizes any viruses and destroys them.
3. When iodine enters the body, it recognizes parasites and attacks them.
4. When iodine enters the body, it scans the body for diseases, identifies the organs most affected, and begins treatment with those organs. At the same time, iodine causes mild short-term discomfort in those organs as a signal to the person. This unique “scanner” property of iodine is astonishing.
5. When iodine enters the body, it recognizes not only living pathogens but also non-living ones, such as toxins like chlorine, fluorine, and bromine, as well as any other harmful substances. It chemically breaks them down and then eliminates them through the lymphatic system, sweat, and urine.
6. If iodine cannot destroy the structure of toxins, it encapsulates them and removes them from the body through the lymphatic system, sweat, and urine. This process is called chelation (from the Greek word *chele* — claw).
7. When iodine enters the body, it recognizes hopeless cells, and if it cannot restore them, it programs these diseased cells to self-destruct. This is known as apoptosis — a regulated process of programmed cell death in which the cell breaks into apoptotic bodies that are quickly cleared by macrophages or neighboring cells without triggering inflammation.
8. Our nano-iodine works in the body for 1.5 hours and is then excreted through urine within 24 hours; it does not accumulate.
9. All human blood passes through the thyroid gland every 17 minutes, and if there is enough non-hormonal iodine in the thyroid, it disinfects the blood and viruses in the bloodstream die within 90 seconds after contact with

---

nano-iodine. The iodine-containing hormones are T3 and T4. Just as these hormones require iodine, our nano-iodine can serve as a source of non-hormonal iodine.

10. Iodine helps mitochondria in every cell to reproduce and function when intake is sufficient. This maintains normal ATP production and helps prevent diabetes and cancer. (ATP — adenosine triphosphate — is the universal energy source for biochemical processes in living systems.)
11. Iodine works at the DNA level. If DNA has defects, including genetic ones, iodine reprograms it and corrects these flaws. Thus, iodine cures genetic or hereditary diseases.
12. Iodine is programmed to find the optimal pathway for eliminating toxins and pathogens. If molecules are too large, they are expelled through vomiting; if slightly smaller, through the respiratory mucosa (mucolysis or expectoration); if smaller still, through sweat and urine.
13. If a person's immune system fails to recognize dangerous viruses, iodine corrects the DNA code and teaches the immune system to recognize these pathogens.
14. If the immune system attacks virtually all organisms and cells as harmful, iodine restores balance and stops the cytokine storm — a potentially lethal immune reaction characterized by excessive activation of immune cells and release of inflammatory cytokines. During the coronavirus pandemic, many people died from cytokine storms.
15. Iodine is a uniquely programmed immune corrector, immune stimulant, and immune modulator for humans.

You have a unique opportunity to take our miracle nano-iodine!
